TOTAL FRAUD PROTECTION BY VESTA

Vesta is a leading FinTech company and the forerunner in guaranteed e-commerce payment solutions. Vesta pioneered the process of fully guaranteed card-not-present (CNP) payment transactions for the telecommunications industry.

Quite simply, Vesta's solution solutions enable merchants to eliminate fraud and substantially grow revenue by delivering secure, frictionless transactions that maximize acceptance and improve the customer experience, all backed by a zero-fraud liability guarantee.

THE DESIGN CHALLENGE

Our client approached us with two primary objectives:

- To enhance the onboarding experience for their new users
- To reduce the intervention of an onboarding specialist from their side

Our high-level goals are

1. Give users more control over their time.
2. Minimise the intervention of the onboarding specialist.
3. Make it simpler for the user to self-onboard into the platform.
4. Guiding the user throughout his onboarding journey.
5. Make the user to experience his best 'AHA MOMENT'

DESIGN PROCESS

Every project is unique and hence requires a unique approach.
For this project, we had enough scope to dive deep not just into the problem but the entire system which helped us to get the perfect outcome at the end.

STARTING FROM WHOLE TO BITS

Though the current project deals only with the onboarding experience, we started from the understanding of the whole system in which there are multiple user roles are involved, their activities and how one part of the system is interconnected to other. This gave us an idea to actually understand the system within the system and what impact an onboarding experience have on the entire system.
